Portfolio: buketmelisaevin.github.io

Letterkenny, County Donegal

PROFILE

UX Researcher and Product Designer with backgrounds in Cyberpsychology and Artificial Intelligence Engineering. Experienced in user research, usability testing, information architecture, accessibility-informed design, high-fidelity prototyping and Human–AI interaction.

EXPERIENCE

Secretary – ATU Green Pantry Society **Dec 2025 - Present**

Atlantic Technological University *Letterkenny/Ireland*

- Coordinate food donation collections, volunteer participation, scheduling, communications and society records while supporting the fair and organised distribution of donated food and essential items to students.

Artificial Intelligence Engineering Intern **Jul 2024 – Aug 2024**

Dijital Sokak *Istanbul/Türkiye*

- Independently designed and developed the AI component of a video game recommendation system, including a custom hyperparameter optimisation tool and iterative model evaluation.
- Collaborated with team members on implementation decisions and communicated technical concepts.

Board Member – Software & Informatics **Sept 2022 - Sept 2023**

Bahçeşehir University *Istanbul/Türkiye*

- Supported academic and industry events, sponsor communications, social media content and audience engagement.
-

SELECTED PROJECTS

TFI Live – Mobile Application Redesign

Master’s UX/UI Project

- Led the end-to-end UX research and redesign, including user interviews, usability testing, information architecture and high-fidelity prototyping in Figma.

ChatGPT Mobile UX Redesign

Human–AI UX & Product Design Project

- Evaluated the mobile experience through Human–AI interaction research and designed concepts addressing prompt guidance, cognitive load, transparency, source credibility and user trust.

Vhi Mobile Application Redesign

Product Designer | Independent Healthcare UX Project

- Conducted a UX and information architecture evaluation and redesigned navigation, universal search, homepage hierarchy, personalisation and healthcare service discovery.

Player Experience & Inclusive Design in Baldur's Gate 3

M.Sc. Cyberpsychology Dissertation | Distinction / 70%

- Designed and conducted a quantitative study with more than 400 participants and analysed the results in R, investigating relationships between perceived inclusivity, player identification, autonomy and relatedness.

AutoML-Based Object Recognition Pipeline

Artificial Intelligence Engineering Project

- Contributed to the design, implementation and evaluation of an end-to-end AutoML pipeline using MLFlow and PyCaret, including system requirements, architecture, iterative testing and technical decision-making.

EDUCATION

M.Sc. Cyberpsychology (Requirements completed, graduation pending)

Sept 2025 – Sept 2026

Atlantic Technological University

Letterkenny/Ireland

Relevant Modules:

- Social Cyberpsychology
- Human-Computer Interaction
- UX Design
- Artificial Intelligence and Ethical Responsibility
- Behaviour Across the Cyber Lifespan

B.S. Artificial Intelligence Engineering

Sept 2020 – Nov 2024

Bahçeşehir University

Istanbul/Türkiye

SKILLS

Design:

Figma, Wireframing, High-Fidelity Prototyping, Mobile UI Design, User Flows, Information Architecture

Research:

User Interviews, Usability Testing, Heuristic Evaluation, Survey Development, Qualitative Research, Quantitative Research

Human-AI Interaction & Accessibility:

Conversational UX, Prompt Guidance, Transparency, Trust, Progressive Disclosure, Accessibility-Informed Design, Apple Human Interface Guidelines

Technical:

Python, R, HTML, MySQL, Data Analysis, Machine Learning, MLFlow, PyCaret, CSS, JavaScript

LANGUAGES

Turkish – Native | English - Fluent
